Developmental Pathways of Addiction and Mental Health

Epidemiological data indicates that the majority of adults with mental illness and/or addiction had identifiable symptoms or traits as children. Current scientific understanding is moving towards describing addiction and mental disorders as early onset, trajectory-based, brain illnesses¹. The developmental perspective has significant implications for the nature and organization of treatment and service delivery across all age groups.

This training is available to all non-AHS staff through the **Primary Health Care Learning Portal** <https://phc.myabsorb.ca/#/login> and AHS staff can take the courses through **MyLearningLink**. <http://insite.albertahealthservices.ca/1881.asp> (Search for 'Developmental Pathways' and the entire series will be displayed) Each module is about 2 hours and CME accreditation is available.

The series was primarily developed by the Edmonton Zone, Addiction and Mental Health, educators with support from AHS Child, Youth and Families Initiatives and the federal Drug Treatment Funding Program.
